

FITBUDDY

AI-Powered Personalized Workout and Wellness Assistant

PHASE 08

Project Demonstration Phase

Provide the final demo flow, speaking script, screen order, expected outputs, and submission checklist.

Prepared for phase-wise submission
30 September 2026

Phase objective: Provide the final demo flow, speaking script, screen order, expected outputs, and submission checklist.

1. Demo Objective

- Show the project from startup to final output in a simple end-to-end story.
- Demonstrate that FitBuddy is more than a static page: it accepts input, validates it, generates a plan, persists data, and revises the plan from feedback.

2. Recommended Screen Order

- Screen 1: VS Code project structure and terminal with activated .venv.
- Screen 2: FitBuddy home page.
- Screen 3: Enter sample profile data.
- Screen 4: Generated 7-day plan.
- Screen 5: Nutrition/hydration/recovery guidance.
- Screen 6: Submit feedback such as "Add yoga and make the plan easier."
- Screen 7: Revised plan.
- Screen 8: /view-all-users.
- Screen 9: /docs.
- Screen 10: final output and conclusion.

3. Speaking Script - Key Points

- Project name: FitBuddy - AI-Powered Personalized Workout and Wellness Assistant.
- Purpose: provide personalized seven-day workout and wellness guidance.
- Benefits: personalization, nutrition/recovery tips, feedback-based revisions, database storage.
- Working process: user input -> validation -> AI/mock generation -> display -> feedback -> revised plan -> storage.
- Technology: FastAPI, Jinja2, SQLite/SQLAlchemy, Pydantic, Google GenAI SDK, JavaScript/CSS, Pytest.
- Final output: a seven-day personalized plan plus nutrition/recovery guidance and an updated plan.

4. Suggested Live Demo Data

- Username: Raja
- User ID: raja01
- Age: 25
- Weight: 70
- Goal: General Wellness
- Intensity: Medium
- Feedback: Add yoga and make the plan easier.

5. Final Demonstration Checklist

- Server starts successfully.
- Home page loads.
- Sample input is ready.
- Plan generation works in mock mode.
- Seven days are visible.
- Nutrition/recovery section is visible.
- Feedback submission works.
- Revised plan is displayed.

- Users page shows the saved record.
- Swagger /docs page loads.
- No API key or secret is shown on screen.

6. Closing Statement

- FitBuddy demonstrates an end-to-end Generative AI web application with personalized workout generation, wellness guidance, persistence, feedback-driven revision, and automated verification.
- The demo should conclude by showing the final revised plan and briefly restating the project value.

Demo Timeline

Segment	Suggested time	Main content
Introduction	20-30 sec	Name + purpose
Problem & benefits	30-40 sec	Why personalization matters
Live input	30 sec	Enter profile
Plan generation	60 sec	Show 7 days
Feedback revision	45-60 sec	Submit and show revision
Backend evidence	30-40 sec	Users + /docs
Conclusion	20-30 sec	Final output + value

Phase Deliverables / Evidence

- Demo screen order
- Speaking script/key points
- Final recording checklist

Submission Note

This phase document is intended to be submitted together with the corresponding FitBuddy source project and evidence captured during execution. Keep API keys, personal credentials, and other secrets out of screenshots and submissions.
